MARÍA GUERRERO LOBO
WEB DEVELOPER

My GitHub username: Mariaguerrero95
My website CV: mariaguerrero95.github.io/web-cv-MariaGuerreroLobo/

I am an enthusiastic and detail-oriented coder with a keen interest in front-end development and web design. I am passionate about creating user-friendly, responsive websites and improving user experiences. I am looking for work opportunities where I can apply my skills in **HTML, CSS, Javascript** and **React** but i am open to work on back-end solutions, such as **mySQL** and **expressJS**. I am a fast learner, always eager to stay up to date with the latest industry trends and technologies, and I thrive in collaborative environments where I can contribute to meaningful projects and grow professionally.

TECH PROJECTS

RICK AND MORTY CHARACTER FINDER
Created a web application to search for characters from the "Rick and Morty" series. Users can view detailed information about each character, including their name, species, and the number of episodes they appear in.
Technologies: **React**, **Vite**, **JavaScript**, **HTML5**, **Sass**
Key Features:
- Character Search: Integrated with an external API to provide detailed information about characters.
- Dynamic Rendering: Used React components to display character details efficiently.
- Performance Optimization: Leveraged Vite for faster development and optimized build processes.
- Responsive Design: Ensured a user-friendly experience across different devices.

ANIME SERIES FINDER
Developed a dynamic web application for searching anime series using an external API. Users can mark their favorite series, manage their favorites by removing individual items or resetting the entire list, and retain their selections even after refreshing the page.
Technologies: **HTML5**, **Sass**, **JavaScript** (**ES6**), **Fetch API**, **LocalStorage**
Key Features:
- Anime Search Functionality: Integrated with an external API to provide real-time search results for anime series.
- Favorites Management: Users can add series to their favorites, remove individual entries, or reset the favorites list entirely.
- Data Persistence: Used LocalStorage to save user-selected favorites, ensuring favorites remain visible after page refreshes.
- Interactive and Responsive Design: Ensured an intuitive user interface and compatibility across devices.

SPORTS E-COMMERCE LANDING PAGE
Designed and developed a responsive landing page for a sports e-commerce brand. The website highlights seasonal promotions and features key sections like product highlights, a back-to-school campaign, and an accessible navigation menu.
Technologies: **HTML5**, **CSS3**
Key Features:
- Fully responsive design, ensuring seamless viewing on both desktop and mobile devices.
- Clean layout with modern design elements, focusing on usability and visual appeal.
- Custom footer and header navigation for improved user flow.
